SUMMARY

- Fifteen years in technology have taken me from frontline support through systems, networks, and cloud infrastructure into a specialization in identity, access, and security. I do my best work in the ambiguous space between teams — translating between security, engineering, and the business — and automating whatever shouldn't be done twice. Curious by nature, on and off the clock.
- Residence Status: Permanent Resident (永住権)

EXPERIENCE

BitMEX

Senior IAM Solutions Engineer

Remote - Tokyo, Japan
September 2025 - Present

- Fleet Security Platform Engineering and Scaling: Designed and built an internal fleet security management platform (Golang/React/Kubernetes/EKS), achieving 25x growth in device coverage to 250+ endpoints within 3 months of general availability.
- Code Quality and Infrastructure Stability Leadership: Authored 90+ merged pull requests and conducted 100+ code reviews across identity, endpoint-management, and PKI systems over 10 months, maintaining zero-downtime delivery on Terraform-managed Okta infrastructure serving 250+ engineers, ensuring code quality standards and infrastructure reliability.
- Enterprise MDM Re-architecture and Modernization: Led company-wide Mobile Device Management platform re-architecture, successfully migrating the entire device fleet to a new management model achieving zero business disruption, followed by organization-wide platform rebrand communication, modernizing device governance and compliance posture.
- AI Developer Tooling Governance and Security: Established fleet-wide governance framework for AI developer tooling including configuration management, credential lifecycle, and security guardrails, resolving critical connectivity and supply-chain security incidents same-day, achieving 100% developer uptime and ensuring secure adoption across the organization.
- Identity Access Compliance and Certification: Managed quarterly identity access-certification campaigns across cloud and Kubernetes environments, auditing and reconciling access across dozens of engineering teams, strengthening least-privilege compliance and enhancing organizational security posture.

Indeed

Lead, IT Solutions

Hybrid - Tokyo, Japan
January 2023 - September 2025

- Global Enterprise Printing Architecture: Served as project lead and architect for a global enterprise printing solution across all regions outside the Americas, improving reliability and scalability for over 10,000 users, reducing print-related issues by 80%, lowering costs by 45%, and increasing user satisfaction by 25%.
- Service Desk Leadership and People Enablement: Led the IT Service Desk team in Japan, mentoring engineers and driving performance enablement while partnering with stakeholders to align support services with evolving business needs.
- Project Management and Process Improvement: Led process improvement initiatives and streamlined workflows, reducing average ticket resolution time by 30% and increasing user satisfaction scores by 20%.

IT Support Specialist II

Hybrid - Tokyo, Japan
April 2021 - January 2023

- IT Asset and Inventory Management: Implemented a comprehensive IT asset and inventory management system, achieving 99% accuracy in asset tracking, reducing procurement costs by 15%, and ensuring 100% compliance with organizational policies.
- Service Desk Operations and Technical Support: Delivered frontline technical support across hardware, software, and access issues for 2000 local users, consistently meeting SLA targets and maintaining high customer-satisfaction scores.
- Global Printing Solution Regional Deployment: Contributed to the initial implementation and regional deployment of a global enterprise printing solution, standing up 4 sites in Japan and validating configurations that established the foundation for a company-wide rollout.

University of Calgary

Senior Systems Specialist

On-site - Calgary, Canada
May 2017 - January 2021

- Microsoft 365 and Azure Administration: Managed and supported Office 365 and Azure Active Directory environments, including user account provisioning, group management, and troubleshooting authentication issues to ensure seamless operations for the Faculty of Arts department.
- Active Directory and Dual-Platform Support: Administered Active Directory for user access control and resource management, reducing access-related incidents by 50% and improving user experience across Windows and Mac systems in a mixed-platform environment.
- System Upgrades and Maintenance: Planned and executed system updates, security patches, and hardware upgrades across departmental servers and workstations, achieving 99.9% uptime and reducing security vulnerabilities by 70%.
- End-User Support and Training: Delivered technical support to faculty and staff, resolving hardware, software, and connectivity issues efficiently while conducting training sessions to enhance user proficiency with enterprise tools.

EDUCATION

BA. Communication and Media Studies

Minor in East Asia Studies • University of Calgary

Calgary, AB, Canada
2021

EX. International Studies

Waseda University

Shinjuku, Tokyo, Japan
2019

AS. Network Administration and Security

College for Arts and Technology

Kelowna, BC, Canada
2011

CERTIFICATIONS

AWS Certified Security - Specialty

Amazon Web Services • 2024

AWS Certified SysOps Administrator - Associate

Amazon Web Services • 2024

AWS Certified Solutions Architect - Associate

Amazon Web Services • 2024

Systems Security Certified Practitioner

ISC2 • 2014

PROJECTS

SwiftX — macOS Screenshot & Automation Tool

June 2026 - Present

retrohazard.github.io/SwiftX/

- Platform Modernization: Ported a full-featured screenshot and file-sharing app from C# to native Swift with complete feature parity, using macOS APIs (AppKit, CoreGraphics, AVFoundation, Metal) for performance and system integration.
- Automation and Workflow: Built 50+ automation features — custom hotkeys, drag-and-drop upload, and post-capture tasks (annotation, compression, URL shortening) — reducing manual sharing steps by up to 80%.
- Cloud Integration: Integrated 20+ storage and sharing services (AWS S3, Google Drive, Imgur) with OAuth and credential management, giving users flexible, lock-in-free deployment.

Japan Immigration Bureaus Statistics Dashboard

January 2025 - January 2026

dashboard.retrohazard.jp

- User Engagement and Data Visualization: Designed and launched a React-based immigration statistics dashboard with customizable charts and user-controlled filtering, attracting over 2,000 users in the first 30 days and providing valuable insights into application trends and processing efficiency.
- Predictive Modeling and Analytics: Developed a processing time estimator using historical trends and 3-month rolling averages, creating a tool to forecast queue positions and completion dates, improving planning for applicants and reducing uncertainty.
- Real-Time Data Integration: Integrated Japan's e-Stat API for up-to-date immigration statistics, ensuring reliability and providing current insights for users, enhancing the dashboard's value and credibility.
- Responsive Front-End Development: Utilized React, Chart.js, and Tailwind CSS to deliver a mobile-friendly, visually appealing interface with theme support, improving user experience across devices.

Cloud Resume Challenge

April 2024 - August 2024

resume.retrohazard.jp

- Full-Stack Cloud Project: Completed the Cloud Resume Challenge, deploying a comprehensive cloud project on AWS, gaining hands-on experience with Tier 1 cloud services, CI/CD pipelines, and Infrastructure as Code.
 - CI/CD and Infrastructure as Code Implementation: Implemented CI/CD pipelines and utilized Infrastructure as Code tools, such as AWS CloudFormation and Terraform, automating the deployment process and ensuring seamless updates and maintenance.
 - Cloud Services Integration: Integrated various AWS services such as S3, Lambda, API Gateway, and DynamoDB, showcasing the ability to design and implement scalable and efficient cloud solutions.
-

SKILLS

Industry Knowledge: Identity & Access Management (IAM), Zero Trust Security Architecture, Identity Federation (SAML, OAuth 2.0, OIDC, SCIM), Access Governance & Certification (Least-Privilege Audits), PKI & Certificate Lifecycle Management, Cloud Security (AWS), Kubernetes Access Control & RBAC, DevSecOps & Software Supply-Chain Security, Endpoint Security & Mobile Device Management (MDM), Application Allow-Listing / Binary Authorization, Vulnerability Management, Security Incident Response, Enterprise AI Governance & AI Tooling Security, Threat Mitigation, Risk Management, Regulatory & Compliance-Driven Controls, Agile, DevOps

Tools & Technologies: Okta, AWS (IAM, EKS, Lambda, CloudWatch, Athena, Bedrock), Terraform / OpenTofu (Infrastructure as Code), Kubernetes, Docker / Helm, GitHub Actions (CI/CD), Git / GitHub, Python, Go, React / JavaScript, Bash / Shell Scripting, Linux, CrowdStrike Falcon, Zscaler, Qualys, Tailscale, SIEM, Iru (formerly Kandji, Apple MDM), macOS / iOS Administration & Apple Business Manager, Slack (API / Admin), LiteLLM / AI Gateway Proxying, Grafana, Jira / Confluence (Atlassian)

Other Skills: Cross-Functional Stakeholder Communication (Security, DevOps, Finance, All-Staff), Incident Response & Crisis Management Under Pressure, Change Management & Organization-Wide Rollout Communication, Technical Writing & Knowledge-Transfer Documentation, Vendor & Tool Evaluation / Build-vs-Buy Decision-Making, Automation-First Problem Solving, Self-Directed Ownership of Ambiguous, Cross-Team Initiatives, Mentoring & Team Leadership, Adaptability, Critical Thinking

Languages: English (Native), Japanese (Limited)
