SUMMARY

- IT Solutions leader with over 15 years of experience building secure, scalable cloud solutions and leading diverse teams. Skilled in AWS, Terraform, Kubernetes, identity management, and automation with Python and Bash. Experienced in CI/CD, GitHub, and Jira for streamlined project delivery. Always eager to learn and grow, I bring a results-driven approach and a passion for leveraging technology to drive business success.
- Residence Status: Permanent Resident (永住権)

EXPERIENCE

BitMEX

Senior IAM Solutions Engineer

Remote - Tokyo, Japan
September 2025 - Present

- Fleet Security Platform Engineering and Scaling: Designed and implemented an internal fleet security management platform (Go/React/Kubernetes/EKS), achieving 25x growth in device coverage to 250+ endpoints within 3 months of general availability, improving security posture and enabling scalable device management infrastructure supporting enterprise-wide security governance.
- Code Quality and Infrastructure Stability Leadership: Authored 90+ merged pull requests and conducted 100+ code reviews across identity, endpoint-management, and PKI systems over 10 months, maintaining zero-downtime delivery on Terraform-managed Okta infrastructure serving 250+ engineers, ensuring code quality standards and infrastructure reliability.
- Enterprise MDM Re-architecture and Modernization: Led company-wide Mobile Device Management platform re-architecture, successfully migrating the entire device fleet to a new management model achieving zero business disruption, followed by organization-wide platform rebrand communication, modernizing device governance and compliance posture.
- AI Developer Tooling Governance and Security: Established fleet-wide governance framework for AI developer tooling including configuration management, credential lifecycle, and security guardrails, resolving critical connectivity and supply-chain security incidents same-day, achieving 100% developer uptime and ensuring secure adoption across the organization.
- Identity Access Compliance and Certification: Managed quarterly identity access-certification campaigns across cloud and Kubernetes environments, auditing and reconciling access across dozens of engineering teams, strengthening least-privilege compliance and enhancing organizational security posture through rigorous access governance.

Indeed

Lead, IT Solutions

Hybrid - Tokyo, Japan
April 2021 - September 2025

- Global Printing Solution Implementation: Designed and implemented a Global Enterprise Printing Solution, improving printing reliability and scalability for over 10,000 users across multiple locations, reducing print-related issues by 80%, reducing costs by 45%, and increasing user satisfaction by 25%.
- IT Asset and Inventory Management: Implemented a comprehensive IT asset and inventory management system, achieving 99% accuracy in asset tracking, reducing procurement costs by 15%, and ensuring 100% compliance with organizational policies.
- Project Management and Process Improvement: Led process improvement initiatives and streamlined workflows, reducing average ticket resolution time by 30% and increasing user satisfaction scores by 20%.
- Service Desk Operations and Stakeholder Communication: Led the IT Service Desk team, ensuring timely resolution of technical issues while maintaining clear and effective communication with stakeholders to align support services with business needs.

University of Calgary

Senior Systems Specialist

On-site - Calgary, Canada
May 2017 - January 2021

- Microsoft 365 and Azure Administration: Managed and supported Office 365 and Azure Active Directory environments, including user account provisioning, group management, and troubleshooting authentication issues to ensure seamless operations for the Faculty of Arts department.
- Active Directory and Dual-Platform Support: Administered Active Directory for user access control and resource management, reducing access-related incidents by 50% and improving user experience across Windows and Mac systems in a mixed-platform environment.
- System Upgrades and Maintenance: Planned and executed system updates, security patches, and hardware upgrades across departmental servers and workstations, achieving 99.9% uptime and reducing security vulnerabilities by 70%.
- End-User Support and Training: Delivered technical support to faculty and staff, resolving hardware, software, and connectivity issues efficiently while conducting training sessions to enhance user proficiency with enterprise tools.

EDUCATION

BA. Communication and Media Studies

Minor in East Asia Studies • University of Calgary

Calgary, AB, Canada
2021

EX. International Studies

Waseda University

Shinjuku, Tokyo, Japan
2019

AS. Network Administration and Security

College for Arts and Technology

Kelowna, BC, Canada
2011

CERTIFICATIONS

AWS Certified Security - Specialty

Amazon Web Services • 2024

AWS Certified SysOps Administrator - Associate

Amazon Web Services • 2024

AWS Certified Solutions Architect - Associate

Amazon Web Services • 2024

Systems Security Certified Practitioner

ISC2 • 2014

PROJECTS

SwiftX — macOS Screenshot & Automation Tool

retrohazard.github.io/SwiftX/

- Platform Modernization and Feature Parity: Ported a comprehensive screenshot and file-sharing application from C# to native Swift, achieving full feature parity with upstream releases while leveraging macOS APIs (AppKit, CoreGraphics, AVFoundation) for optimal performance and system integration.
- Automation and Workflow Enhancement: Implemented 50+ automation features including custom hotkeys, drag-and-drop upload, cloud service integrations, and post-capture tasks (annotation, compression, URL shortening), enabling power users to streamline content sharing workflows and reduce manual steps by up to 80%.
- Capture and Recording Infrastructure: Engineered robust screen capture and video recording systems supporting multiple output formats, real-time frame capture via Metal rendering, and configurable quality settings, enabling creators to rapidly produce and share multimedia content.
- Cross-Platform Service Integration: Integrated 20+ cloud storage and sharing services (AWS S3, Google Drive, Imgur, etc.) with credential management and OAuth authentication, providing users with flexible deployment options and reducing lock-in to proprietary solutions.
- Swift Architecture and Performance: Designed modular Swift codebase with proper separation of concerns, async/await patterns, and type-safe APIs, reducing maintenance burden while improving code reliability and enabling rapid iteration on new features through clear architectural boundaries.

Japan Immigration Bureaus Statistics Dashboard

dashboard.retrohazard.jp

- User Engagement and Data Visualization: Designed and launched a React-based immigration statistics dashboard with customizable charts and user-controlled filtering, attracting over 2,000 users in the first 30 days and providing valuable insights into application trends and processing efficiency.
- Predictive Modeling and Analytics: Developed a processing time estimator using historical trends and 3-month rolling averages, creating a tool to forecast queue positions and completion dates, improving planning for applicants and reducing uncertainty.
- Real-Time Data Integration: Integrated Japan's e-Stat API for up-to-date immigration statistics, ensuring reliability and providing current insights for users, enhancing the dashboard's value and credibility.
- Responsive Front-End Development: Utilized React, Chart.js, and Tailwind CSS to deliver a mobile-friendly, visually appealing interface with theme support, improving user experience across devices.

Cloud Resume Challenge

resume.retrohazard.jp

- Full-Stack Cloud Project: Completed the Cloud Resume Challenge, deploying a comprehensive cloud project on AWS, gaining hands-on experience with Tier 1 cloud services, CI/CD pipelines, and Infrastructure as Code.
- CI/CD and Infrastructure as Code Implementation: Implemented CI/CD pipelines and utilized Infrastructure as Code tools, such as AWS CloudFormation and Terraform, automating the deployment process and ensuring seamless updates and maintenance.
- Cloud Services Integration: Integrated various AWS services such as S3, Lambda, API Gateway, and DynamoDB, showcasing the ability to design and implement scalable and efficient cloud solutions.

SKILLS

Industry Knowledge: Identity & Access Management (IAM), Zero Trust Security Architecture, Identity Federation (SAML, OAuth 2.0, OIDC, SCIM), Access Governance & Certification (Least-Privilege Audits), PKI & Certificate Lifecycle Management, Cloud Security (AWS), Kubernetes Access Control & RBAC, DevSecOps & Software Supply-Chain Security, Endpoint Security & Mobile Device Management (MDM), Application Allow-Listing / Binary Authorization, Vulnerability Management, Security Incident Response, Enterprise AI Governance & AI Tooling Security, Threat Mitigation, Risk Management, Regulatory & Compliance-Driven Controls (NIST-Aligned Hardening, CIS Benchmarks, ISO 27001, GDPR), Agile & DevOps

Tools & Technologies: Okta, AWS (IAM, EKS, Lambda, CloudWatch, Athena, Bedrock), Terraform / OpenTofu (Infrastructure as Code), Kubernetes, Docker / Helm, GitHub Actions (CI/CD), Git / GitHub, Python, Go, React / JavaScript, Bash / Shell Scripting, Linux, CrowdStrike Falcon, Zscaler, Qualys, Tailscale, SIEM, Iru (formerly Kandji, Apple MDM), macOS / iOS Administration & Apple Business Manager, Slack (API / Admin), LiteLLM / AI Gateway Proxying, Grafana, Jira / Confluence (Atlassian)

Other Skills: Cross-Functional Stakeholder Communication (Security, DevOps, Finance, All-Staff), Incident Response & Crisis Management Under Pressure, Change Management & Organization-Wide Rollout Communication, Technical Writing & Knowledge-Transfer Documentation, Vendor & Tool Evaluation / Build-vs-Buy Decision-Making, Automation-First Problem Solving, Self-Directed Ownership of Ambiguous, Cross-Team Initiatives, Mentoring & Team Leadership, Adaptability, Critical Thinking

Languages: English (Native), Japanese (Basic)
